

Linux Practical Examination

Module 1: Linux Basics for Cloud

Time: 1.5 Hours | Maximum Marks: 50

Platform: AlmaLinux (Local VM)

Instructions: Perform all tasks on the Linux terminal. Evaluation is based on successful execution and explanation.

Student Name: _____ Roll No: _____

Section A: System & File Management (15 Marks)

- 1 1. Display your current directory, logged-in username, and system hostname.
- 2 2. Create a directory named cloud_lab inside your home folder.
- 3 3. Inside cloud_lab, create a file named intro.txt and write 3 lines about Linux.
- 4 4. Display the contents of intro.txt using two different commands.
- 5 5. Copy intro.txt to backup.txt and then rename backup.txt to linux_backup.txt.

Section B: Permissions & Ownership (10 Marks)

- 1 6. Display the permissions of all files in cloud_lab.
- 2 7. Change permissions of intro.txt so that only the owner can write, and everyone can read.
- 3 8. Explain the meaning of rwxr-xr-- to the examiner.

Section C: Package & Service Management (15 Marks)

- 1 9. Update the system package list.
- 2 10. Install Apache web server (httpd).
- 3 11. Start the httpd service and check its status.
- 4 12. Enable httpd service to start on boot.

Section D: Mini Lab – Web Server (10 Marks)

- 1 13. Create a simple webpage in /var/www/html/index.html.
- 2 14. The page must display your name and the text: 'My First Linux Cloud Server'.
- 3 15. Restart the web service and demonstrate the page on the browser (localhost).

Evaluation Rubric

Criteria	Excellent (Full Marks)	Good (Partial)	Needs Improvement	Marks
Basic Commands	Correct execution and clear explanation	Minor mistakes, concept clear	Unable to explain	10
File Management	All tasks correct, clean structure	1–2 minor errors	Multiple errors	10
Permissions	Correct permissions + explanation	Correct but unclear explanation	Incorrect	10
Package & Services	Apache installed, managed independently	Installed with help	Unable to complete	10
Mini Web Lab	Website runs correctly and explained	Website runs, explanation weak	Not working	10

- Trainer Notes:**
- Encourage students to explain while performing.
 - Focus more on understanding than memorization.
 - This exam also prepares them for AWS cloud labs.
